DETAILED ACTION

1. Claims 1-12 and 16-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, neither anticipates nor renders obvious the following limitations as claimed:
[Claim 1]: A charge transfer device having a source follower amplification circuit, wherein the source follower amplification circuit comprises "... a control transistor connected between the amplification transistor and a second power source, wherein the control transistor controls a current flowing from the second power source to the amplification transistor according to a control signal, to thereby control the current flowing from the amplification transistor to the side of the first power source; and , an output control circuit, connected to a gate of the control transistor, for outputting the control signal for reducing a current flowing from the second power source to the amplification transistor during a period in which a pixel signal, is not read.
[Claims 7, 19, 20]: The reasons for allowance for these claims are substantially similar to claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
